

Biology Seminar

12:30 - 1:30 pm
Friday, March 26, 2021
Seminar to be held via ZOOM

1) David Smith
Associate Professor
Department of Biology
Faculty of Science
Western University

2) Brent Sinclair
Professor
Department of Biology
Faculty of Science
Western University

1) A series of short stories on genome evolution in plants, algae and protists

A lighthearted look at David's sabbatical year, touching upon his and his lab's escapes into the evolution of genomic architecture, with a particular focus on organelle genomes.

2) Remember travel?

On my sabbatical I went to Namibia to tick off some bucket-list plants and invertebrates. Come for the pretty pictures, stay for the natural history and environmental physiology.
