COURSE DESCRIPTION:

There is no place in modern society where the ancient world has had a greater and more apparent impact than the Olympic Games and modern sports competition. The purpose of this class is to explore the topic of athletics and spectacle in Ancient Greece and Rome with a view to its cultural and historical specifics, while also considering how the logic of competition in the ancient world relates to modern day practices. The course will rely on archaeology, art, poetry, primary literary sources, and secondary scholarship in order to reconstruct the historical practices and ideologies involved with ancient sports. We will focus on the history of the ancient Olympics, the violence of Roman sport and spectacle including gladiator combat and chariot races, ancient conceptions of gender and sport, the relationship between ancient and modern sports medicine, and the role of ancient athletics in the history of the modern Olympic games.
