

Operational Excellence Online Journal Entries

Session Topics

1. Enter an Online Journal
2. Edit, Budget-check, and Post
3. Create a new Journal by copying from an existing Journal
4. Delete an un-posted Journal
5. Print a Journal
6. Inquire on a Journal

We'll start by walking through the topics in today's session:

We will do some large and small group discussion along the way and overall the session will be fast paced and fun and we are glad you are joining us today!

Session Topics

1. Enter an Online Journal
2. Edit, Budget-check, and Post
3. Create a new Journal by copying from an existing Journal
4. Delete an un-posted Journal
5. Print a Journal
6. Inquire on a Journal

Online Journal Entry

- Journal Date
- Header Tab
- Lines Tab
- Errors Tab

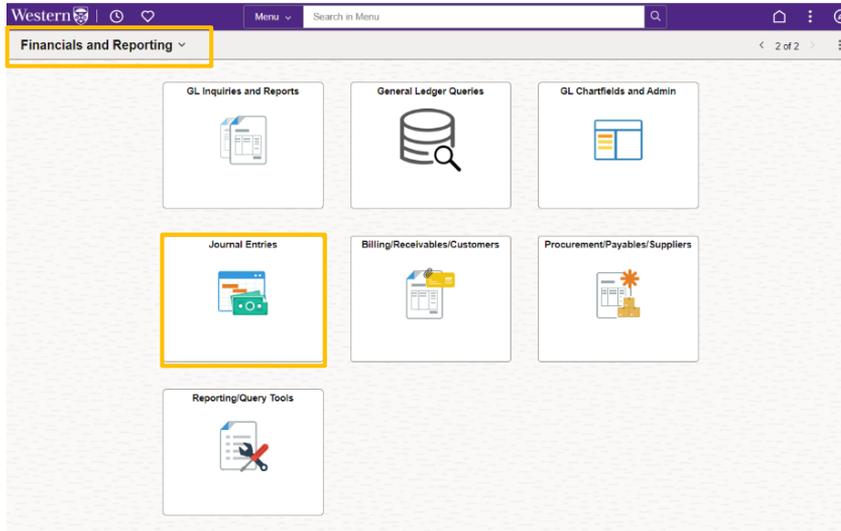

What is a Journal Entry?

A journal entry is a balanced transaction that moves money between chartfield combinations and contains debits and credits.

When entering a Journal Entry, there are a few items a user will need to address. These items include: Journal date, Header tab, UWO Lines tab, Totals tab, Errors tab.

Journal Entries Dashboard - Navigation Path

To access the **Journal Entries dashboard**, click on the **Financials and Reporting** homepage, then click on the **Journal Entries** tile.

Journal Entries Dashboard-Navigation Path

The screenshot displays the 'Journal Entries' dashboard. At the top, there is a purple navigation bar with a search box labeled 'Search in Menu' and icons for home, menu, and refresh. Below the navigation bar, the page title 'Journal Entries' is shown. On the left side, a vertical menu is highlighted with a yellow border, containing the following items: 'Actuals Journal Entry' (selected), 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main content area is titled 'Journal Entry' and includes a 'New Window' link. Below this, there is a section for 'Add a New Value' with a 'Find an Existing Value' button. The form contains three input fields: '*Business Unit' with the value 'UWFO', '*Journal ID' with the value 'NEXT', and '*Journal Date' with the value '04/12/2024'. An 'Add' button is located at the bottom of the form.

All of the different Journal Entry related topics we will cover today, will be listed in the menu options area in the Journal Entries dashboard (as highlighted on the left side of this page)

Enter an Online Journal- Navigation Path

The screenshot displays the 'Journal Entries' application interface. On the left, a sidebar menu has 'Actuals Journal Entry' highlighted. The main area is titled 'Journal Entry' and features a 'New Window' button. A 'Find an Existing Value' search bar is located at the top right. The 'Add a New Value' tab is active, showing a form with the following fields: '*Business Unit' (UWO), '*Journal ID' (NEXT), and '*Journal Date' (04/12/2024). An 'Add' button is positioned below the date field.

To enter an online journal entry, click on **Actuals Journal Entry** menu option. This will automatically open on the Add a New Value tab.

Business Unit will default according to your user profile (for most users this will be "UWO").

Journal ID will always be "Next", for the next available journal number in the system. The journal ID number will be visible for all GL transactions and can be used to track down additional information when reconciling (e.g. who created the journal, when, for how much, etc.) Users cannot enter their own journal number.

Journal Date will default to "Today's" date, but can be changed:

- If the journal date needs to be changed, it can only be changed HERE, and not later
- The journal date determines the accounting period of the transaction (e.g. if the journal is date is May, then it will be posted in Period 1)
- Most users should not need to alter the default journal date, and would only change the date if the journal needed to be posted in a specific month or accounting period that is not "today's" date (e.g. today is the last day of the month, but you want to create a journal for the next month – you could change the date to "tomorrow", which will post the journal into the next month)
- Most users need special permission from Financial Services to back-date a

journal – please check before you try!

- Journals created with the wrong date must be deleted if not yet posted, or copied, and must be reversed if posted
- Journal dates can be forward-dated to any open accounting period, (to end of current Fiscal Year), but can only be back-dated to the first day of the month of the current open period (e.g. if today's date is September 29, the open period is 5, so the earliest possible journal date would be September 1)
- Western's Fiscal Year runs from May 1 to April 30, with 12 accounting periods (May = Period 1, December = Period 8, etc.)

Once the ***Business Unit** and ***Journal Date** fields have been addressed, click on the "Add" button to begin the journal entry process.

Enter an Online Journal - Header Tab

The screenshot shows the 'Header' tab of the 'Enter an Online Journal' form. The 'Header' tab is highlighted with a yellow box. The form includes the following fields and options:

- Unit: UWO
- Journal ID: NEXT
- Date: 04/12/2024
- Long Description: [Text input field with 254 characters remaining]
- Ledger Group: ACTUALS (dropdown menu)
- *Source: ONL (text input with search icon)
- Reference Number: [Text input field]
- Fiscal Year: 2024
- Period: 12
- Attachments (0)
- Entered By: SCUPDEMO
- Entered On: [Text input field]
- Last Updated On: [Text input field]
- Buttons: Save, Notify, Refresh, Add, Update/Display
- Checkboxes: Save Journal Incomplete Status

The Header contains the high level information about the Journal – i.e. the Journal number, date, description, entered-by, source, etc. Each journal has only 1 Header, but will contain multiple journal lines.

Header | Lines | Totals | Errors

Enter a Speed Code plus an Account. Once the Speedcode has been entered, it will disappear from the line when the journal is saved.

It is recommended that you enter your journal lines using a Speed Code plus an Account. Entering a speed code will automatically populate all other related chartfield combinations. Please note, once the journal is saved, the speedcode will disappear from the journal line.

Enter an Online Journal - Lines Tab

Or, enter the Account + Fund + Dept + Program ***or*** Project (never both). However it is recommended to use Speedcodes whenever possible to avoid potential chartfield combination errors

Alternatively, you can enter the full chartfield combination of Unit, Account, Fund, Dept, and either Program or Project (never both Program and Project).

- We strongly recommend using Speedcodes to avoid edit errors.
- Funds 1 and 3 will usually have a Program, but never a Project.
- Funds 2, 4, and 6 will never have a Program but must always have a Project.

Reference field is 10 characters wide

Journal Line Description field is 30 characters wide. Will contain the "Account" description by default.

The Reference field is 10 characters wide, and the Journal Line Description is 30 characters wide. Use them to provide more information that is specific to the transaction line (e.g. "Purolator" as a Reference, or "September 2015 charges" as a Line description).

- Journal Line Description will default to the "account description" if you do not enter a line description.

Enter an Online Journal-Lines Tab Standard Accounting Practices

- Expenses moved by a Journal Entry should *identify* the specific expenses being moved by *referencing* the original expense transaction.
 - *Identify* the specific expense to be moved by locating the transaction using the GL Inquiry tool.
 - *Reference* the original expense transaction in the Journal Line Reference Field to create an audit trail.

When moving an expense, there are standard accounting practices you should follow.

Expenses moved by a Journal Entry should identify the specific expenses being moved by referencing the original expense transaction.

You can identify the specific expense to be moved by first locating the original transaction in Western's General Ledger using the GL Inquiry tool. You'll want to note the transaction's Account code, the Program/Project where it is posted, and the amount. This is the Account and Program/Project that must be credited (-) by the Journal Entry.

Once you've identified your expense, you can then reference the original expense transaction using the Reference and Journal Line Description Fields.

Enter an Online Journal-Lines Tab Standard Accounting Practices

4	UWO		645000	2	370450		R4171A14	CAD	-123.56	CAD	E0259877	Train ticket Toronto
5	UWO		601220	2	370450		R4171A19	CAD	1,000.00	CAD	0200239785	April 2020
6	UWO		602000	2	370450		R4171A14	CAD	130.00	CAD	0200239785	April 2020
7	UWO		601220	2	370450		R4171A19	CAD	-1,000.00	CAD	0200239785	April 2020
8	UWO		602000	2	370450		R4171A14	CAD	-130.00	CAD	0200239785	April 2020

Here is an example of how you can reference the original expense transaction in your journal entry.

Lines 1 and 2 move Supplies Expenses:

- The journal line Reference field is the Voucher number.
- The Journal Line Description field provides details on the expense being moved.

Lines 3 and 4 move Travel Expenses:

- The Journal Line Reference field is the Expense Claim number.
- The Journal Line Description provides details on the expense being moved.

Lines 5 through 8 move Salary and Benefit Expenses:

- When Salary Expenses are moved, the corresponding Benefit expenses must also be moved.
- The journal line Reference field represents the Employee ID number.
- The Journal Line Description field indicates the time period of salary/benefits being moved.

As you'll notice, every expense requires its own pair of Journal Lines. One line for the debit and the other for the credit.

Please note, Journal Entries may not be used to move expenses planned for the future or to provide a generalized reimbursement; specific expenses must be identified.

Enter an Online Journal - Errors Tab

The screenshot displays the 'Journal Entries' interface. On the left, a sidebar contains options: 'Actuals Journal Entry' (selected), 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main area has tabs for 'Header', 'Lines', 'Totals', and 'Errors'. The 'Errors' tab is active, showing two sections: 'Header Errors' and 'Line Errors'. The 'Header Errors' section shows a table with columns 'Field Long Name' and 'Message Text', with the message 'No journal headers are marked in error'. The 'Line Errors' section shows a table with columns 'Field Long Name' and 'Message Text', with the message 'No journal line between line 1 and line 2'. Two yellow callout boxes are overlaid on the screenshot. The first callout box, pointing to the 'Header Errors' section, contains the text: 'Header Errors will contain Journal Status errors that apply to overall Journal e.g. Debits do not equal to credits or journal date is not in an open accounting period'. The second callout box, pointing to the 'Line Errors' section, contains the text: 'Line Errors contain combination errors when an invalid Chartfield has been used e.g. an inactive project code or has an invalid combination of chartfields'. At the bottom of the interface, there are buttons for 'Save', 'Notify', 'Refresh', 'Add', and 'Update/Display'.

The Errors tab will display Header and Line Errors you Journal Entry may have if entered incorrectly.

Header errors will contain Journal Status errors that apply to the overall journal – e.g. debits do not equal credits, or the journal date is not in an open accounting period.

Line Errors contain combination errors when an invalid Chartfield has been used (e.g. an inactive Project code) or where an invalid combination of chartfields exists (e.g. having Fund 2 but missing a Project).

- Valid chartfield combinations must include a Unit, Account, Fund, and Dept
- Funds 1 and 3 will usually have a Program, but never a Project
- Funds 2, 4, 5, and 6 must always have a Project, but never a Program

Session Topics

1. Enter an Online Journal
2. **Edit, Budget-check, and Post**
3. Create a new Journal by copying from an existing Journal
4. Delete an un-posted Journal
5. Print a Journal
6. Inquire on a Journal

Once you create the Journal Entry the next step is doing an Edit check. You can also do a Budget check and post it, if everything passes. Let's have a look at that now...

Edit, Budget-Check, & Post

- Not required to be done by the user, but users are responsible to ensure that their journals pass the Edit check
- All 3 processes are run automatically each night in batch by the system
- Once a journal is successfully posted, it will be reflected in the GL Inquiry details after the nightly processes are completed

Journals must successfully pass an Edit check and a Budget check before they can be posted, and are 3 separate processes.

Once posted, the journal activity is reflected in the GL Inquiry reports the next day. Reporting tables are updated nightly.

Users do not have to run any of these processes, however users must ensure that their journal passes the Edit check.

Edit Check

The screenshot displays the 'Journal Entries' interface. At the top, there is a search bar and navigation icons. Below this, the 'Journal Entries' section is visible, with a sidebar on the left containing options like 'Actuals Journal Entry', 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main area shows a 'Journal ID: NEXT' and 'Date: 04/12/2024'. A dropdown menu is set to 'Process Edit Journal', and a 'Process' button is highlighted. Below this, a table lists journal lines with columns for 'Select', 'Line', 'Unit', 'Speed Code', 'Account', 'Fund', 'Dept', 'Program', 'Project', 'Currency', 'Amount', 'Base Currency', 'Reference', and 'Journal Line Description'. Two lines are shown: Line 1 (UWO) with a credit of 225.00 CAD for 'Supplies', and Line 2 (UWO) with a debit of -225.00 CAD for 'Travel - General'. A 'Totals' section at the bottom shows 'Total Debits: 225.00' and 'Total Credits: 225.00'. A 'Journal Status' field is highlighted, showing 'N' for 'Not checked'. Buttons for 'Save', 'Notify', 'Refresh', 'Add', and 'Update/Display' are also visible.

The Edit process will verify that a journal is balanced for debits and credits, and will check that all chartfields are valid and active.

It also checks that the combination of chartfields is correct – e.g. Funds 1 or 3 with a Program, Funds 2, 4 ,5, or 6 with a Project.

Before the Edit process is initiated, the Journal Status on the UWO Lines tab will be “N” – Not checked.

Once completed, the Journal Status will be either “V” for Valid, or “E” for Error. Users must ensure that their journals have a Journal Status = “V” whether they run the Edit Journal process or not. Some users choose to run the process immediately, while others will wait for the overnight process to run and then check the journal status later.

If you want to run the Edit Check process immediately after entering your journal details, select the Edit Journal process and click on the process button to run the check.

Budget Check

The screenshot shows a web-based financial application interface. At the top, there is a navigation bar with a search box and a 'New Window | Personalize Page' link. Below this is a sidebar menu with options like 'Actuals Journal Entry', 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main content area is titled 'Journal Entries' and contains a form for creating or editing a journal entry. The form includes fields for 'Unit' (set to 'UWD'), 'Journal ID', and 'Template List'. Below these are 'Lines' and 'Totals' sections. A callout box with a yellow border and arrow points to the 'Journal Status' field in the 'Totals' section, which contains the letter 'V'. The 'Journal Status' field is highlighted in the callout box with the text: 'Budget check can only begin once the Journal Status (from Edit check) is "V" (Valid)'. The 'Totals' section shows 'Total Debits' and 'Total Credits' both set to '225.00'. The 'Budget Status' field is empty. The interface also includes a 'Save' button and a 'Refresh' button.

Unit	Total Lines	Total Debits	Total Credits	Journal Status	Budget Status
UWD	2	225.00	225.00	V	

The journal must successfully pass the Edit check (Journal Status = "V") before Budget check can begin.

Budget check ensures that each journal line (having a valid combination) has a valid budget set up for expenses or revenues, depending on the account used. Valid combinations that pass Edit check may still fail Budget check.

Budget Check

Once the Budget check is completed, the Budget Status will be "V" (Valid) or "E" (Error)

Unit	Total Lines	Total Debits	Total Credits	Journal Status	Budget Status
UWO	2	225.00	225.00	V	E

The Budget check process is done in conjunction with the Edit Journal process on the UWO Lines tab of the Actuals Journal Entry pages.

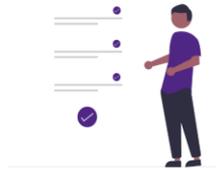

If all of the journal lines pass the Budget check, the Budget Status will be "V". If any lines have a budget error, the Budget Status will be "E".

Most users do not need to verify that their journal is successfully Budget checked. If there are Budget errors, the appropriate analyst in Financial Services or IPB will be notified and they will determine whether to set up a budget or move the affected line to a different combination. You do not have to contact your Analyst.

You will be contacted by someone in Financial Services if any action is required on your part.

Post

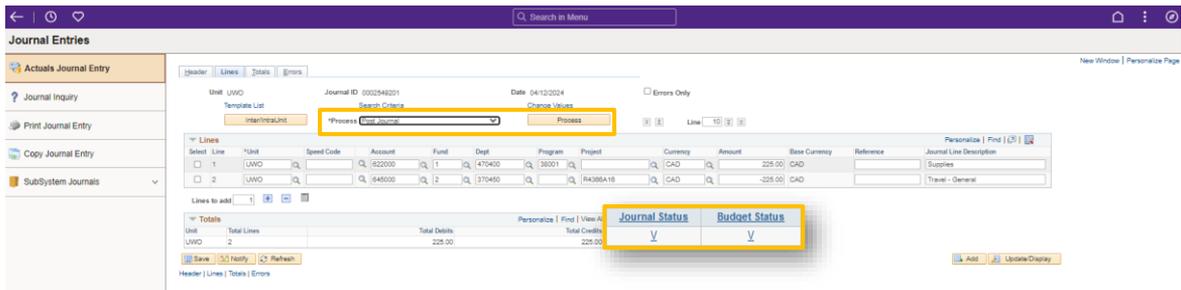

- Journals can only be Posted once they are Valid for both Journal Status (Edit check) and Budget Status (Budget check)
- Once a journal is posted, the debits and credits will be reflected in the GL Inquiry reports once the nightly processes are completed

Once a Journal is Valid for both Edit check and Budget check, it can be Posted. We often refer to these journals as "Valid-Valid".

Posting the journal will update the General Ledger, and the debits and credits from the journal lines will be visible in the GL Inquiry reports the next day, once the nightly processes have completed. Even if the journal is posted by the user during the day, it will not be visible in the GL Inquiry reports until the next day.

Post

This Journal can be posted now because it is Valid-Valid (see the bottom right corner for Journal Status and Budget Status).

Choose the Process option "Post Journal" (already selected in this example) and then click the Process button. Once a journal is posted, the Journal Status will be changed to "P" but the Budget Status will always remain "V".

Posted Journals cannot be modified, deleted, or un-posted.

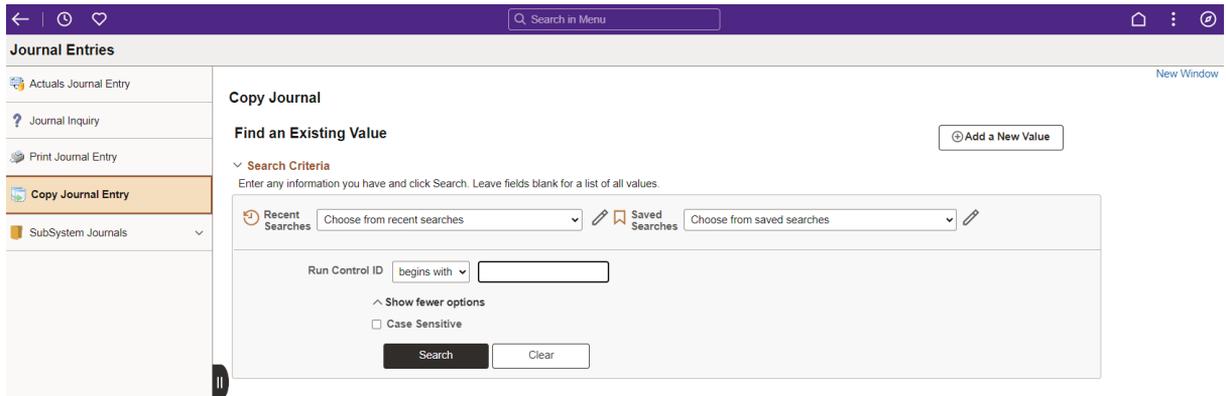

Most users do not need to Post their journals, especially if the Journals are already in a Valid-Valid state. The system will Post all journals later in the evening and will update the GL Inquiry reports. The Post process runs efficiently in batch mode and it is an un-necessary step for most users.

Session Topics

1. Enter an Online Journal
2. Edit, Budget-check, and Post
3. Create a new Journal by copying from an existing Journal
4. Delete an un-posted Journal
5. Print a Journal
6. Inquire on a Journal

Copy a Journal

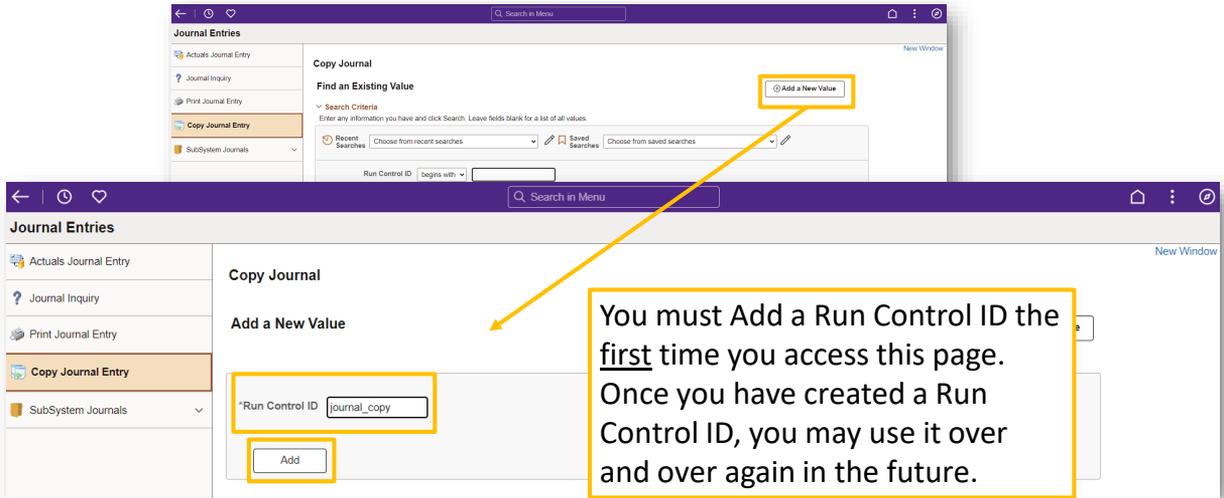

Copying a journal can be effective when the same type of journal needs to be created on a regular basis.

It is not the same as “printing a copy”, but many users have mistakenly copied journals when they meant to print a journal.

Not all users will have the ability to copy a journal, but we will cover the process during this class. If you must copy a journal, you need to contact Financial Services to request additional security access. The Copy Journal Entry menu option highlighted above will not be listed if you do not have access.

Copy a Journal

When copying a journal for the first time, a new "Run Control ID" must be created. To create a new Run Control ID, click on the "Add a New Value" button. Do not use spaces when creating a new run control ID.

Copy a Journal

The screenshot shows the 'Copy Journals Request' page in a web browser. The page title is 'Copy Journals Request' and the Run Control ID is 'journal_copy'. The 'Process Request Parameters' section contains a table with the following data:

Process Frequency	Unit	*Journal ID	*Date	New Journal ID	New Date	Reverse Signs	Save Journal Incomplete Status
Always	UWO	0001396387	07/31/2003	NEXT	04/12/2024	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Annotations in yellow boxes provide instructions:

1. Enter the Journal ID that you want to copy from
2. Click on the magnifying glass icon for *Date and select the Journal Date

Enter the prior journal number and date that you want to copy from in the *Journal ID and *Date fields.

Copy a Journal

Ensure that the New Journal ID is "NEXT", and select the New Date for the new journal you are going to create. You must do this every time!

Process Frequency	Unit	Journal ID	Date	New Journal ID	New Date	Reverse Signs	Save Journal Incomplete Status
Always	UWO	0001396387	07/31/2003	NEXT	04/12/2024	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

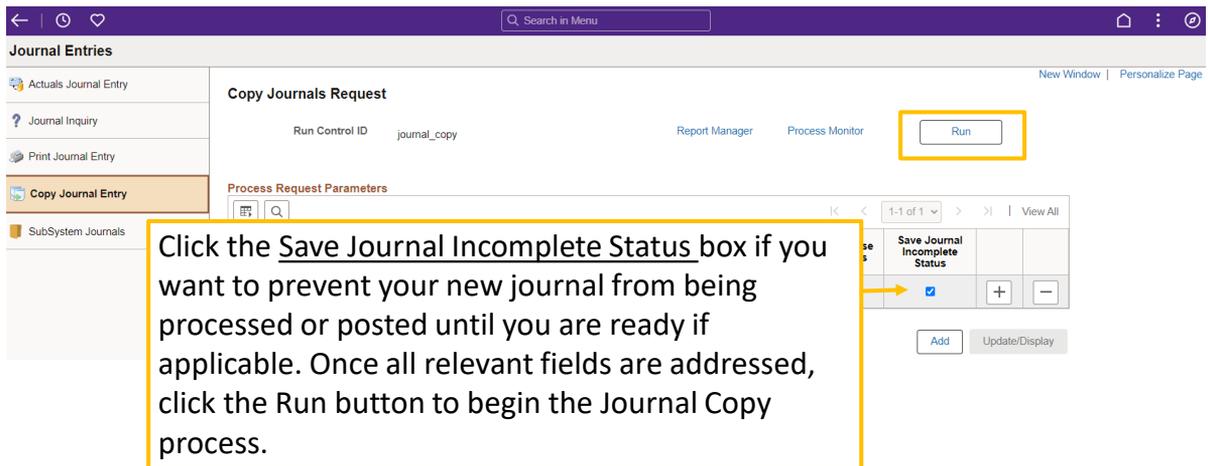

Only use the Reverse Signs checkbox to create a new journal that has reversed debits and credits

Ensure that "NEXT" is always displayed in the field under "New Journal ID", and select the new date for the new journal before proceeding to run the copy process. You must do this EVERY time.

- Same rules as creating an online journal, can be forward-dated to any open accounting period, (to end of current Fiscal Year), but can only be back-dated to the first day of the month of the current open period (e.g. if today's date is September 29, the open period is 5, so the earliest possible journal date would be September 1).

Use the reverse signs checkbox when you want to create a new journal with reversed debits and credits.

Copy a Journal

The screenshot shows a web application interface for 'Copy Journals Request'. The top navigation bar includes a search menu, home icon, and user profile. The left sidebar lists 'Journal Entries' with options: 'Actuals Journal Entry', 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry' (highlighted), and 'SubSystem Journals'. The main content area shows 'Run Control ID' as 'journal_copy' and buttons for 'Report Manager' and 'Process Monitor'. A 'Run' button is highlighted with a yellow box. Below this, the 'Process Request Parameters' section contains a table with a 'Save Journal Incomplete Status' checkbox checked. A yellow callout box with an arrow pointing to the checkbox contains the following text:

Click the Save Journal Incomplete Status box if you want to prevent your new journal from being processed or posted until you are ready if applicable. Once all relevant fields are addressed, click the Run button to begin the Journal Copy process.

You can use the "Save Journal Incomplete Status" flag to prevent the new journal from being processed or posted until you are ready. If you choose this option, remember that you will need to remove the flag (and hit the "save" button to save your change) from the Journal Header tab before your journal can be posted.

Click the Run button to begin the Journal Copy process.

Copy a Journal

The screenshot displays the 'Journal Entries' application interface. On the left, a sidebar menu has 'Actuals Journal Entry' highlighted. The main window shows the 'Journal Entry' form with the 'Find an Existing Value' tab selected. A yellow box highlights the 'Find an Existing Value' tab, and an arrow points to the 'Search' button in the search criteria section. Below the search criteria, a table shows search results with 3 results. The first result is highlighted with a yellow box.

Business Unit	Journal ID	Journal Date	Journal Header Status	Budget Checking Header Status	Ledger Group	Journal Total Lines	Journal Total Debits	Journal Net Statistical Units	Description
UWIO	0002549202	04/12/2024	(blank)	Not Chkd	ACTUALS	2	0		Third Party Charges per May 20

To access a journal you just copied, go to the Find an Existing Value tab on Actuals Journal Entry menu option and click on the Search button to populate your unposted journals. From there, select the applicable copied journal by clicking on the Journal ID's blue link to make any relevant edits.

Session Topics

1. Enter an Online Journal
2. Edit, Budget-check, and Post
3. Create a new Journal by copying from an existing Journal
4. **Delete an un-posted Journal**
5. Print a Journal
6. Inquire on a Journal

Delete an un-posted Journal Demo

- Only **un-posted** journals can be **deleted**
- Useful when you realize you have made a mistake that cannot be fixed (e.g. incorrect journal date, or copied a journal and forgot to reverse signs, etc.)
- You can only delete your own journal
- Deleted journals are gone forever!

Occasionally you will find that a journal that you just created needs to be deleted – perhaps the date was incorrect, or you mistakenly copied the wrong journal, or forgot to reverse the signs.

Journals can only be deleted if they have not already been posted.

If you need to delete a posted journal (you can't) then you will have to create a correcting journal to fix the incorrect journal – either by entering a new online journal entry, or by copying the posted journal and reversing the signs.

Once deleted, a journal cannot be resurrected.

Delete an un-posted Journal

The navigation path to delete an unposted journal is the same as when creating a journal.

Business Unit	Journal ID	Journal Date	Journal Header Status	Budget Checking Header Status	Ledger Group	Journal Total Lines	Journal Total Debits	Journal Net Statistical Units	Description
UWO	0002549202	04/12/2024	(blank)	Not Chk'd	ACTUALS	2	0	0	Third Party Charges for May 20

The navigation path to delete an unposted journal is the same as when creating a journal in that you click on the Actuals Journal Entry menu option. To pull up an unposted journal, navigate to the Find an Existing Value tab on the Actuals Journal Entry menu option, then click on the search button to populate unposted entries, or search by entering a journal ID into the Journal ID field.

Delete an un-posted Journal

The screenshot shows the 'Journal Entries' interface. On the left is a sidebar with 'Actuals Journal Entry' selected. The main area has tabs for 'Header', 'Lines', 'Totals', and 'Errors', with 'Lines' selected. The header information includes 'Unit UWO', 'Journal ID 0002549201', and 'Date 04/12/2024'. Below this is a 'Search Criteria' section with a dropdown menu set to '*Process Delete Journal' and a 'Process' button. At the bottom is a table with columns: Select, Line, *Unit, Speed Code, Account, Fund, Dept, Program, and Project. Two rows are visible: Line 1 with Unit UWO, Account 622000, Fund 1, Dept 470400, Program 38001; and Line 2 with Unit UWO, Account 645000, Fund 2, Dept 370450, Program, and Project R4366A16.

Once you've found your unposted journal, click on the Lines tab (this is the second tab next to the Header tab).

Deleting a journal can only be done from the Lines tab.

Remember to change the "Process" option from Edit Journal to **Delete Journal**

If you cannot find the journal you want to delete, it's possible that the journal has already been posted. You can only view unposted journals in the **Actuals Journal Entry** menu option.

Session Topics

1. Enter an Online Journal
2. Edit, Budget-check, and Post
3. Create a new Journal by copying from an existing Journal
4. Delete an un-posted Journal
- 5. Print a Journal**
6. Inquire on a Journal

Print a Journal Demo

There are two ways to print a journal

1. From the Lines tab on the Actuals Journal Entry (journal must still be un-posted, and created by you)
2. From the Print Journal Entry(journal can be in any status, created from any user)
 - A new Run Control ID will be required (no spaces in the name!)

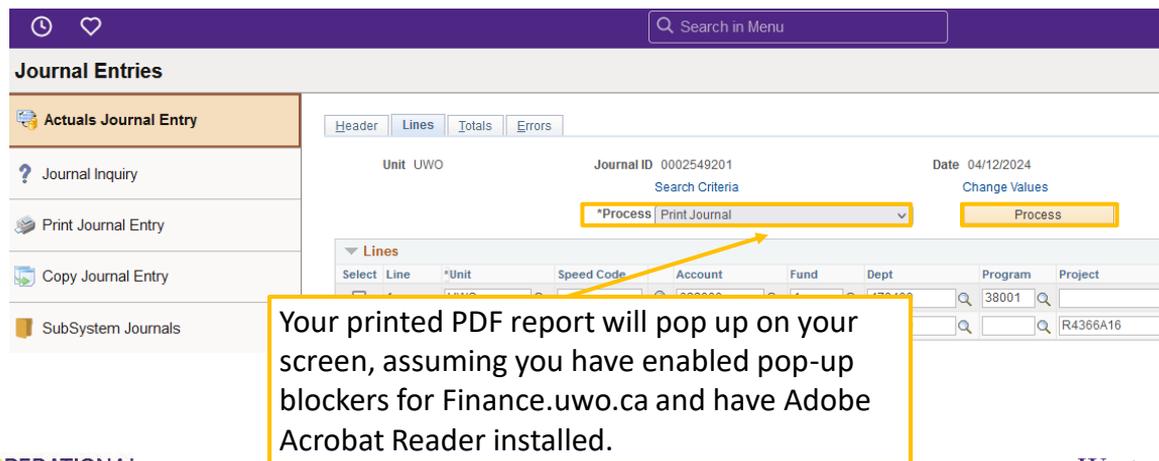

Printing a journal entry is very easy to do from the Actuals Journal Entry page while the journal is still in an un-posted state.

Once a journal has been posted, or to print a journal that someone else created, use the Print Journal Entry menu option listed in the Journal Entries dashboard.

- When using the Print Journal Entry option, a Run Control ID will have to be created the first time you run the process. From then on, you can re-use the same run control over and over. Do not use any spaces when creating a run control ID.

Print an unposted Journal From the Lines tab

The screenshot shows the 'Journal Entries' interface. On the left, there is a sidebar with options: 'Actuals Journal Entry' (selected), 'Journal Inquiry', 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main area displays 'Unit UWO', 'Journal ID 0002549201', and 'Date 04/12/2024'. Below this, there are tabs for 'Header', 'Lines', 'Totals', and 'Errors'. The 'Lines' tab is active, showing a table with columns: 'Select', 'Line', '*Unit', 'Speed Code', 'Account', 'Fund', 'Dept', 'Program', and 'Project'. A dropdown menu is open over the table, showing the option '*Process | Print Journal' selected. A yellow box highlights this option, and an arrow points to it from a text box. The text box contains the following text: 'Your printed PDF report will pop up on your screen, assuming you have enabled pop-up blockers for Finance.uwo.ca and have Adobe Acrobat Reader installed.' A yellow 'Process' button is also visible to the right of the dropdown menu.

Your printed PDF report will pop up on your screen, assuming you have enabled pop-up blockers for Finance.uwo.ca and have Adobe Acrobat Reader installed.

To print an unposted journal that has been created by you, click on the Actuals Journal tab and find your unposted journal by searching it in the find an existing value tab.

Go to the Lines tab of the unposted journal entry and select the Process option "Print Journal" (already selected here). Click on the Process button. Your printed report should pop up on your screen, assuming that you have enabled pop-up blockers for finance.uwo.ca and have Adobe Acrobat Reader installed on your computer.

Print a Journal From the Journal Print menu

The screenshot shows the 'Journal Entries' dashboard. The 'Print Journal Entry' menu item is highlighted in the left sidebar. The main content area shows the 'Print Journal Entry' page with the 'Add a New Value' button highlighted. A callout box explains that a Run Control ID must be added the first time the page is accessed.

You must Add a Run Control ID the first time you access this page. Once you have created a Run Control ID, you may use it over and over again in the future.

To print a posted journal created by you or another user- use the Print Journal Entry menu option listed in the Journal Entries dashboard.

Create a new Run Control ID the first time you run this process. Afterwards you can use the same run control ID again.

4. Delete an un-posted Journal
5. Print a Journal
6. **Inquire on a Journal**

Journal Inquiry Demo

- A useful tool for reconciliation purposes
- You may need to know more about a journal number that appears in your GL Inquiry or nVision report
- Can inquire on any journal

The Journal Inquiry page is very useful in looking up other journals to find more information. This can be useful for administrators who must reconcile GL Inquiry or nVision statements and have a journal number that is for an unknown charge.

Any journal can be found using the Journal Inquiry page.

You can verify the status of journals created the previous day, if you did not perform the edit check. If journal(s) have an error, you must fix your journal.

Journal Inquiry

The screenshot shows the 'Journal Inquiry' page in a web application. At the top, there is a purple navigation bar with a search icon and the text 'Search in Menu'. Below this is a header area with 'Journal Entries' on the left and 'New Window |' on the right. A sidebar on the left contains a menu with options: 'Actuals Journal Entry', 'Journal Inquiry' (highlighted in orange), 'Print Journal Entry', 'Copy Journal Entry', and 'SubSystem Journals'. The main content area is titled 'Journal Inquiry' and contains a 'Journal Criteria' form. The form includes fields for: Inquiry (value: INQUIRY), *Unit (value: UWOW), *Ledger (value: ACTUALS), *Year (value: 2013), *From Period (value: 1), *To Period (value: 12), Suspense Status, Journal ID, Date, Status, Source, Currency, Stat, Document Type, User (value: SCUPDEMO), Document Sequence, Sort By (value: Journal Id), Max Rows (value: 100), Attachment Exist, and a checkbox for 'Date Code Adj'. Below the form are buttons for 'Search', 'Delete', and 'Clear'. At the bottom of the form area are buttons for 'Save', 'Return to Search', and 'Notify'. On the far right of the form area are buttons for 'Add' and 'Update/Display'. The bottom of the page features the 'OPERATIONAL EXCELLENCE' logo on the left and the 'Western UNIVERSITY - CANADA' logo on the right.

Navigation path (breadcrumb) Financials and Reporting Homepage> Journal Entries dashboard> Journal Inquiry.

You can find the Journal Inquiry tool listed as a menu option in the Journal Entries dashboard, as well as in the GL Inquiries and Reports tile under the Inquiries menu option as "Journal Inquiry".

The Journal Inquiry page requires a new Inquiry Name the first time you use it. From then on, you can use the same Inquiry Name every time.

Online Journal Entry - Tips

- Check out the **Help and FAQs** menu option in the Journal Entries Tile for more information and training/reference materials related to journal entries.
- For journals with a large number of lines, ask us about the Journal Import Template (an Excel-based tool). This offline utility imports journal lines directly into Western Financials. Contact us by email at finsys@uwo.ca

Journal Import Template

Worksheet File for Creating PeopleSoft Upload Journal Files

Instructions:

- 1 Enter **either** SpeedCode or complete ChartField Combination. If you enter both, the SpeedCode will be used.
- 2 Verify the Journal Header information on the Control Worksheet.
- 3 Enter the ChartField Information on this worksheet. **Data after the first blank row will be ignored.**
- 4 You must not move, insert or delete any of the columns on the details worksheet.
- 5 Verify that the Journal is balanced by reviewing the summary information on this panel.
- 6 Upload the journal by clicking on the "Upload Journal Button".
- 7 You must enter an amount on every line (even if it zero) or some of the lines will not be uploaded.

Journal Header Information

Journal Source	PO
Operator ID	PURAAB
Business Unit	UWO
Journal Date	20151119
Journal Description	My Header description here
Backdate (#of days)	<- Zero except

Line Count	36
Total Debits	173,704.42
Total Credits	(173,704.42)
Net Amount	0.00

Journal #	NEXT
Status	Ready

Upload Journal

Reset

Limitations:

- 1 It takes about 1 second for every 25 lines being uploaded.
- 2 The maximum number of lines you can upload in a single journal is 2500 lines.
- 3 In order to use this template, you must have been given access to the UWO_GL_ACT_JRNL_LOAD role.

This Spreadsheet has been configured to upload journals to FSPRD.

The *Journal Import Template* will upload journal lines from an Excel template directly into Western Financials without having to enter the lines online via the Journal Entry menu.

This is very useful for creating journals with a large number of journal lines.

Summary

In this session, here's what we've covered...

- Creating, Deleting, and Copying Journals
- Edit, Budget-check, and Post processes
- How to print a journal
- How to inquire on a journal
- The concept of Run Control ID's/Inquiry Names
