### NOTES:

- (a) In situations of refinancing where there is a major renovation or addition, the total amount of mortgages after refinancing must not exceed the total amount before refinancing plus the costs of the renovation or addition. This means that refinancing is not a plan to convert equity in a principal residence to cash. It is a plan to assist in the mix of debts structure (between 1st and 2nd mortgages), and to finance a renovation or addition.
- (b) Application should be made for the approval of a guaranteed loan before the member submits an offer to purchase a residence property, if such assistance will be required by him/her in connection with such purchase. The application should be directed to the Controller.
